About us

Chigwell Window Centre manufacture, supply and install a range of aluminium and uPVC windows and doors from our bases in Essex.

Chigwell Window Centre opened our first showroom in Romford, a key destination for top-quality bi-fold doors, windows, and roof products since its opening in Collier Row in March 2016.

Building on our success, we expanded with additional showrooms in Loughton, Brentwood, and Epsom, extending our reach and showcasing our commitment to excellence in these regions.

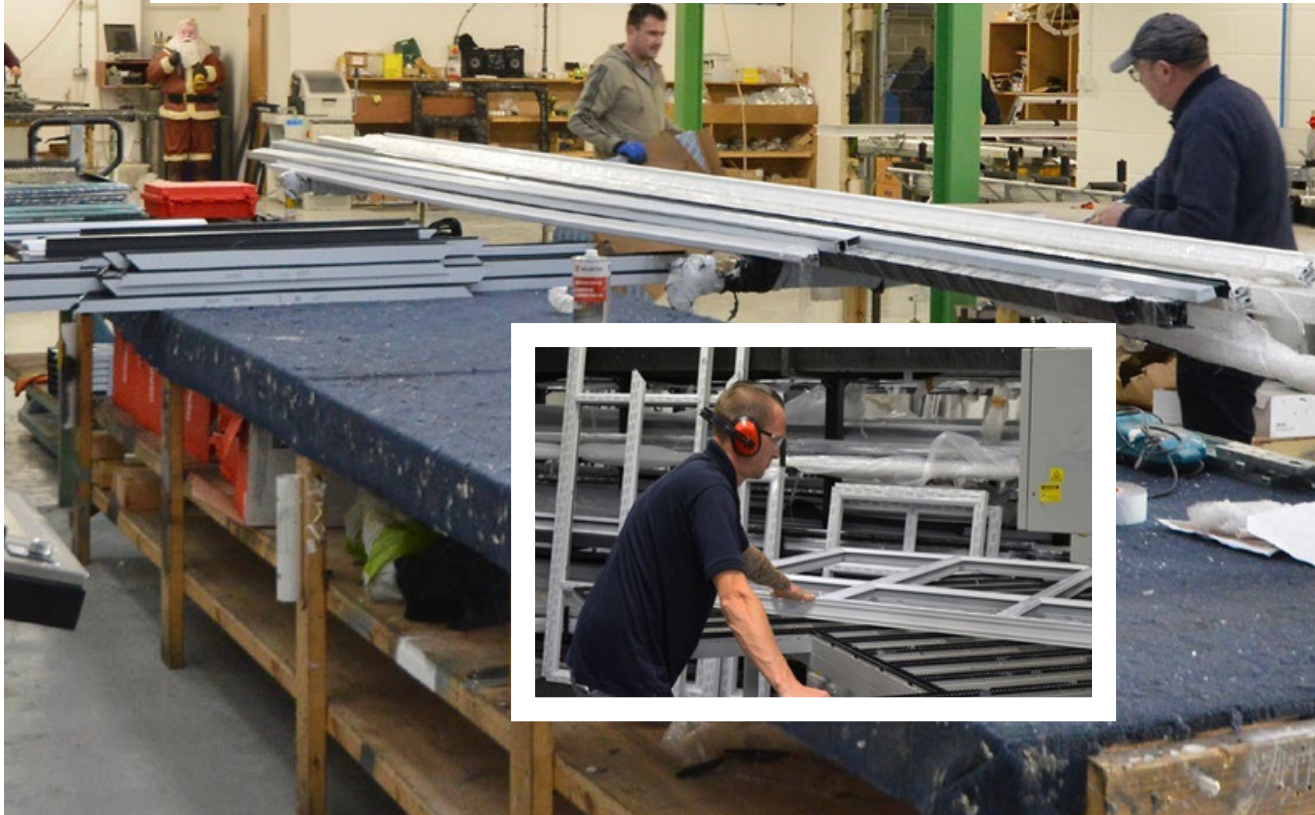

Each location offers a unique display of our products and services, solidifying our position as a leading provider in the area.

Factories & showrooms

All of our products are manufactured in-house in one of our two factories located in **London Hainault**, so we take full responsibility for the quality of all of our range.

State of the art machinery, and highly trained staff enables us to produce a high volume of premium quality bespoke products every week. The fact that our products are manufactured in-house also allows us to ensure each and every one of our range meets our high quality demands and checks before it leaves our premises.

The whole production process is undertaken by our skilled staff who take pride in producing products to the very highest standard.

Chigwell Window Centre also has four showrooms; in Romford, Loughton, Brentwood and our fourth one in Epsom where our trained sales persons can show you our extensive product range and give you advice on all of your home improvement projects.

Buying made easy

When deciding on the products you wish to purchase from Chigwell Window Centre you have the choice of either coming into one of our three showrooms to discuss your requirements or we can send one of our experienced sales staff to visit you in your home.

We will go through all the options for your chosen products, discuss design, colours and accessory choices. Once you have decided which Chigwell Window Centre products you wish to purchase we complete all the paperwork and take a deposit so that we can put your order into production.

We then arrange a site survey date. When we are contracted to carry out the installation, we will always undertake an extensive full site survey beforehand. This allows us to ensure that all aspects of the job run smoothly, guaranteeing a perfect finished project and maximum customer satisfaction.

An installation date is then agreed and once you are happy that all the work has been carried out to your satisfaction we then ask you to pay the balance of the agreed purchase price.

You will then receive our 10 year guarantee certificate and your FENSA certificate will be forwarded to you in a few weeks after installation.

1. Visit one of our showrooms, or we can come and see you

2. Design quotation and payment schedule

3. Free on site survey

4. Book an installation date 020 8500 4900

5. Deliver, fit and enjoy

6. Our guarantee to give you peace of mind

Brands we manufacture

Chigwell Window Centre manufacture a range of aluminium and uPVC products including:

- Bi-folding doors
- Windows
- Composite doors
- Sliding patio doors
- uPVC doors
- French doors
- Single doors
- Rooflights & Lanterns

We use our own Ezifold profile for our aluminium bi-fold doors as well as other leading brands for the products listed above.

Warranties & accreditations

All our accreditations demonstrate the independently verified quality and safety systems operated by the company. 10 year warranties are provided as standard with all products we supply and fit. These warranties are insurance backed and a full after-sales service is provided.

Some of our happy customers

“Chigwell Window Centre fitted a beautiful set of French doors for me. We were really torn on the design and colours we wanted to go for and Gary the salesman at Collier Row really helped us. We are so happy with the service we received and how quickly they came to fit it. My mum is now having bi-folds fitted on her extension after seeing what a good job they did at our house”.

DUNCAN

“This company done such a fabulous job on the fitting of my roof lantern. I was so hesitant at first as they look so modern but i was given the option to have the more traditional look at i couldn't be happier. 10/10 would recommend”. LYDIA

“Had a new front door installed this week, absolutely love it, so many good comments on it. Fabulous job done by the Team' Pleasant efficient and clean workmen, would definitely recommend this company. Thank you Chigwell”.

SHIRLEY

“Very good company, they made us some large apex windows which look great, and spent a lot of time with us answering questions. Their after-sales care is great too - they came back straight away to fix an issue, good communication, no problems, would recommend”.

KELLY

“The team at Chigwell exceeded our expectations, both with the service and product. We wanted to replicate a Crittal style door and they patiently listened to our brief and built doors and windows that fulfilled it to the letter. We had a communication issue on the install date and they rectified it at their own inconvenience. The true mark of a good company, not just delivering a good service but how they pick up the ball if it's dropped. Thank you and we will be recommending Chigwell!”

WILL AND KRISTINA

“Chigwell windows have done a fantastic job of our windows and doors, their customer service is excellent, they keep you updated the whole time. The team of fitters are so respectful, and have done a great job they worked extremely hard throughout the whole process. Would highly recommend this company.

GILL

“Purchased my UPVC windows & doors from Chigwell Window Centre. The team were very informative and really helpful in advising on design and specification. The whole thing from start to finish was excellent, cannot praise the team enough. The finished product looks amazing and has really changed the appearance of our house. Will definitely be recommending to family & friends”.

ALUMINIUM

Bi-fold doors

Chigwell Window Centre produce four bi-folding doors systems. Our very own Ezifold profile and the Smart Visofold 1000 and 6000 bi-fold doors and the Heritage doors and windows.

Chigwell Window Centre aluminium bi-fold doors are renowned for their stunning sight- lines, practical operation and exceptional durability. As one of the country's specialist bi-fold door manufacturer, supplier and installer, we have installed countless bi-folds in a vast range of configurations and styles.

Features & options

Huge range of configurations

With the wide range of opening configurations available to you, it's plain to see how bi-fold doors accommodate and improve any setting with ease and low-maintenance. Pro-actively 'stacking' each door behind the other, choose from internal or externally folding sashes, side openings, a single entrance door or a double door opening.

Thermally sound

The aluminium of today features a polyamide thermal break, which heightens the unit's energy efficiency. Combining high quality gaskets and weather brushes to repel the harshest of weather, our bi-fold doors provide overall U-values as low as 1.5 m²K. Working towards a carbon neutral operation, Smarts Architectural Aluminium leads the way for sustainability.

A stunning range of colours & finishes

Both bi-fold door profiles are available in over 200 colours, including metallic, woodgrain, dual colour and textured finishes. Enhancing and improving any style of property they're applied to; with Chigwell Window Centre you can create your dream home with the minimal amount of fuss, whether it's white bi-fold doors, black bi-fold doors or custom bi-fold doors, we've got the perfect solution for you.

ALUMINIUM

Sliding patio doors

As with our bi-fold door range, Chigwell Window Centre offer two sliding door products, Cortizo's Cor Vision Plus and Smart's Visoglide Plus range.

Chigwell Window Centre patio doors offer a simplistic appearance with a functional opening mechanism. Made to measure, these versatile entrance options have become a popular feature in many homes across the country.

ALUMINIUM

Front doors

Our aluminium front doors fit in with a range of property styles and personal preferences. From traditional curved 'Sculptured' panels to the contemporary sloping edged 'Chamfered' composite panels and the slimmest & thermally sound aluminium sight-lines, we are confident that we can cater to all tastes and budgets

All of our front doors comply with the latest building regulations for security and have been rigorously tested for peace of mind. Their high-quality materials also maximise their thermal capabilities, eliminating any draughts and keeping the warmth in your home.

OUR SMART ALUMINIUM FRONT DOORS ARE AVAILABLE IN HUNDREDS OF COLOURS

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

SMART ALUMINIUM FRONT DOORS ARE AVAILABLE
IN A VARIETY OF STYLES TO SUIT ANY PROPERTY

COMPOSITE

Front doors

Chigwell Window Centre composite front doors provide a sleek appearance, coupled with a low- maintenance, draft proof design. Made to measure, these hardy entrance options are ideal for a cost-effective upgrade that doesn't compromise on security.

Our composite door collection is suitable for any residential or commercial property. Customise your new composite door with an exciting number of glazing styles, colours and finishes. So whether you're looking for a black, grey or white composite door, we can design the perfect replacement door for you.

COMPOSITE DOORS COME IN A RANGE OF COLOURS AND STYLES, WITH AND WITHOUT GLASS.

uPVC

Aluplast

ALUMINIUM

Windows

Smart, Alitherm 300

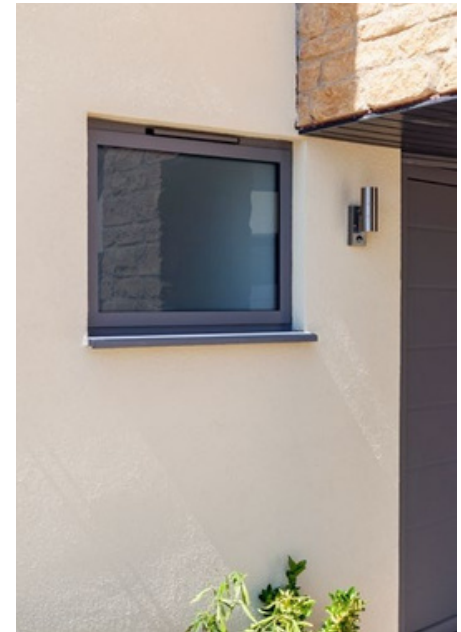

With its customisable appearance, the Smart Alitherm 300 aluminium windows can suit any style of property, from heritage to new build. We can finish them with an almost maintenance-free paint powder coating in a range of smooth colours, meaning they won't fade or warp over time. They have the ability to last a lifetime.

Aluminium is the ideal material for homes and businesses that require taller and wider expanses of glass to let in more natural light. An array of extras are also available, including sophisticated integral blinds between the double-glazed windowpane to retain your privacy.

ALUMINIUM WINDOWS ARE FAST BECOMING THE MATERIAL OF CHOICE FOR MANY HOMEOWNERS.

smart
architectural aluminium

ALUMINIUM

Heritage Windows

Our Alitherm Heritage range provides the ideal solution for heritage applications such as listed building renovations and large scale replica-refurbishment projects where planning constraints are to be considered. The window is designed to be built as a series of horizontal modules which can be stacked using horizontal couplers to form a multi-part window featuring a specially design drip bar between modules.

Alitherm Heritage profiles utilise Smart's innovative polyamide thermal break technology which creates a barrier between the cold air outside and the warm air inside. This technology significantly reduces thermal transmittance and enhances the overall U Value of a product.

Alitherm Heritage products are available in a choice of standard or non-standard colours, including metallic, dual colour, Smart's Sensations textured, and Alchemy anodised effect finishes.

A MODERN THERMAL ALUMINIUM SOLUTION FOR BOTH HERITAGE AND REFINISHMENT PROJECTS WHERE THE REQUIREMENT TO REPLACE OLD STEEL WINDOWS IS ESSENTIAL

uPVC

Windows

uPVC has been a popular home improvement window material choice for many years. However, over the last decade or so, the quality and security of uPVC has drastically improved and allowed for a new era of uPVC renovation technology to emerge.

Our Aluplast Ideal 70 window system are extremely low maintenance and energy-efficient. They take the best of British aesthetics, and combine them with precision German engineering. The Aluplast uPVC system makes homes warmer and more secure. These windows and doors are well-known for having slim sight-lines and impressive eco credentials.

Roof-lights

THE PERFECT ADDITION FOR ANY PROPERTY EXTENSION

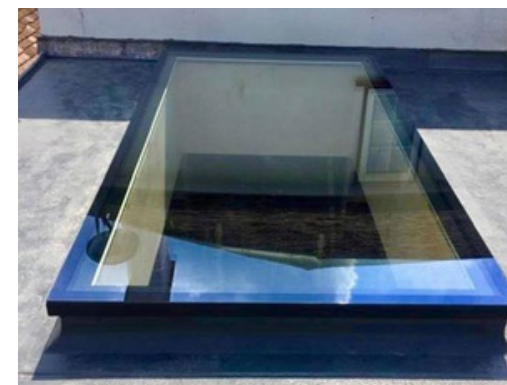

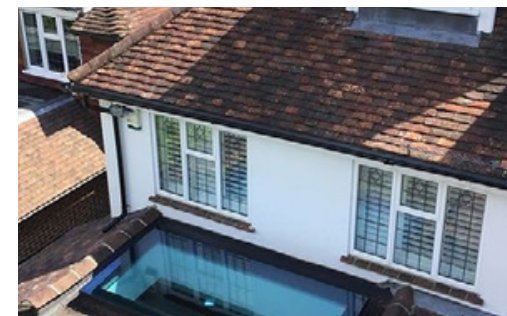

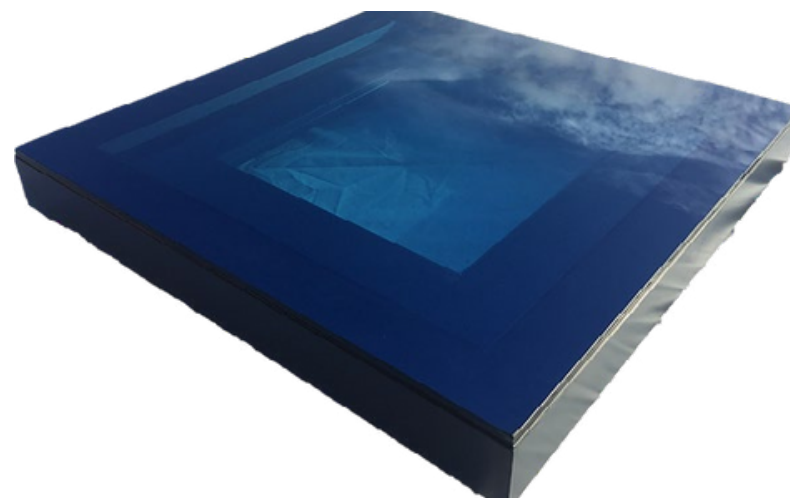

The Titan Edge is a roof-light solution that ticks every box. Its polished edge to edge glass exterior is not only stunning but also has many practical benefits. Its clever design allows any water to simply glide off its surface, and not be hindered by perimeter sealants or protruding frames. Standing only 63mm above the roof up-stand, it will blend seamlessly into any project.

Whilst allowing maximum light to flood in, the Edge is working to keep the unwanted heat out and the ambient room temperature constant, giving you the benefit of year-round comfort and performance.

The Titan 'EDGE' has a very careful selection of high performance glazing components. It benefits from both low maintenance solar reflective glass outside and low emission laminated glass inside, structurally bonded into the unique super-slim edge thermally broken aluminium frame providing all-year-round comfort with a typical U-Value of 1.3 w/m²k (overall roof).

Security

A very welcomed standard feature of the Titan 'EDGE' is laminated security glass to the inner panel. The shatterproof laminated glass is included as standard and provides homeowners with safety, security, noise reduction, and 98% reduction in UV rays which prevents sun bleaching. This addition gives you peace of mind as it's very difficult to penetrate from the outside as well as the inner panel is shatterproof laminated glass so provides optimum safety.

ALUMINIUM ROOF LANTERNS DELIVER MAXIMUM
LIGHT AND ADD A TOUCH OF STYLE

Lanterns

Whether you're inside looking up, or outside looking enviously in a roof lantern puts any property in a class of its own.

Their unique design creates a feeling of more sky giving you visible elegance to your roof design and appearance, whether you choose an aluminium structure or want PVCu capping – less is definitely more.

Chigwell Window Centre lanterns offer exceptional benefits and the internal and external design compliments any home whilst flooding any room with maximum light.

Integral Blinds

Hardware

Colours

Aluminium is not only extremely strong, light and durable but it has the benefit of being powder coated in over 150 RAL colours, a polyester powder-coat paint which is baked onto the aluminium which creates a high quality, durable and tough finish that can withstand all weather conditions.

Our uPVC products come in a wide range of colours, including beautiful woodgrains and coloured foils. Single and dual colour products are available allowing you to have different colours on the inside and out. You may choose to have a more traditional appearance, with painted or timber look effects. Likewise, modern properties often suit a grey anthracite or cream finish. With so many options, there is something for every project.

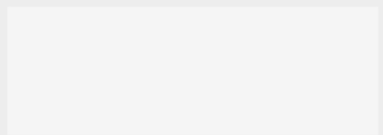

Some popular colours

BLACK – RAL 9005

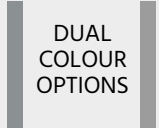

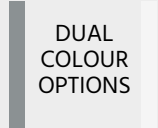

ANTHRACITE GREY – RAL 7016

WHITE – RAL 9016

WOODGRAIN RANGE OF COLOURS – LIGHT OAK EXAMPLE

Security

You can have peace of mind knowing your home will be secure with high security multi-point hook locking mechanisms fitted as standard to our sliding doors, and shoot bolt locks on Bi-folds with internally glazed sealed units.

Windows come with multi-point locking systems and a high security interlocking bead – which is extremely difficult to remove once glazed.

Integral Blinds

Dusting blinds is a thing of the past with our electric and manual integral blinds. The magnetic control allows users to control the raising and lowering of the blind in between the glass as well as the tilting of the Venetian aluminium slats, making for a sleek innovated design.

The magnets themselves are small and purposely designed to be hidden amongst the frame of the window.

NO MORE DUSTING REQUIRED WHEN YOU
HAVE INTEGRAL BLINDS

Hardware

All our windows and doors are fitted with quality handles, designed to work in unison with our products. Our handles come in brushed aluminium, chrome, white, black and gold.

STYLISH AND STRONG. WE ONLY USE THE BEST QUALITY HARDWARE

Choose Chigwell Window Centre because...
